

The 6th EWEN is entitled “Feeding horses with forage based diets and impact of grazing systems on environment” and the scientific programme will include six main sessions with the following topics:

Якщо фінансова допомога потрібна терміново, найкращим рішенням стануть [гроші за 1 хвилину](#), які надходять на картку відразу після схвалення анкети. Автоматизовані системи скорингу працюють миттєво, аналізуючи дані без участі людини, що значно прискорює процес. Вам не доведеться чекати годинами на дзвінок менеджера або підтвердження операції. Такий формат кредитування ідеально підходить для критичних ситуацій, коли кожна секунда на рахунку, а питання вимагає негайного вирішення.

Un aspetto da non trascurare riguarda il [prezzo Cialis senza ricetta](#), che spesso varia a seconda della piattaforma scelta. Alcuni siti garantiscono offerte interessanti, altri puntano sulla velocità di consegna. Informarsi in anticipo permette non solo di risparmiare, ma anche di essere certi della qualità del farmaco acquistato.

Registration steps can sometimes discourage new users. Platforms known as [online casinos without verification](#) simplify onboarding significantly. This approach appeals to players who value speed.

[FULL SCIENTIFIC PROGRAMME - PDF \(click to download\)](#)

Ikke risiker å spille hos casinoer som driver med svindel [sikre casino online](#). Sjekk vår guide til high roller casino hvor du kan spille.

Якісна і дуже вигідна [позика під 0 відсотків](#) передбачає підписання договору онлайн в інтернеті. Без дзвінків та відмови.

Day 1

20

th

June

Session 1

Оформити швидко [позику без відмов](#) на карту. Взяти гроші в позику

Plant Physiology and its relation to feeding value (9.15 h - 10.30 h)

Chair: Jan Erik Lindberg

Keynote Speaker: Perttu Wirkajärvi

Session 2

Nutritional assessment of forage quality (11.00 h - 12.45 h)

Chair: Pat Harris

Keynote Speaker: Annette Longland

Session 3a

Grazing/ Ingesting Behaviour (14.00 h - 15.45 h)

Chair: Geert Janssens

Restare aggiornati sulle [tendenze](#) attuali e per tutte le informazioni specifiche unirsi al programma

Keynote Speaker: Koldo Osoro

Keynote Speaker: Bertrand Dumond

Session 3b

Grazing and Pasture Management (16.10 h - 17.55 h)

Chair: Maria João Fradinho

Keynote Speaker: Ray Smith

Швидка

[грошова позика онлайн на карту](#) — це сучасний стандарт вирішення фіна

Poster Session

Posters from all Sessions + 20 and 38 (18.00 h - 19.00 h)

Chair(s): Rui Caldeira, Miguel Rodrigues, Rui Bessa and Luís Ferreira

Day 2

2

Full day - Technical Tour + Country Dinner

Country Dinner (with demonstrations of local breeds and traditions) (19.30h)

Day3

—

—

22

nd

June

Session 4

Impact of Harvest, preservation and storage conditions on forage quality (09.00 h - 10.30 h)

Chair: Manfred Coenen

Keynote Speaker: Cecilia Muller

Session 5a

Forage Feeding Systems (11.00 h - 12.45 h)

Chair: Markku Saastamoinen

Keynote Speaker: Anna Jansson

Session 5b

Forage digestion and utilization by equids (14.00 h - 15:15 h)

Chair: Véronique Julliand

Session 6

Evaluating Body condition

Chair: Véronique Julliand

Session 7

Management of parasitism in grazing equids (15.15 h - 16.20 h)

Chair: Geert Janssens

Session 8

Sustainable development of rural areas with horses (16.20 h - 17.55 h)

Chair: *William Martin-Rosset*

Keynote Speakers: Nicoletta Miraglia and Bridget Young.

Conclusions and Closing Ceremony (16.00 h)

Official Gala Dinner (20.30 h)

[FULL SCIENTIFIC PROGRAMME - PDF \(click to download\)](#)

Each of these sessions will comprise a main report given by an invited speaker, free communications and posters. A technical tour is scheduled on the second day (21th of June) with the main purpose of showing and promoting the local horse breeds, their main uses and traditions and divulging some investigation related with the meeting subjects.

Invited Speakers

Perttu Virkajärvi

Ph.D. in 2004 by University of Helsinki, Plant Production Science. His teaching career includes Docent in Plant Production Science, University of Helsinki 2009 and Professor in grassland production in 2011 MTT, Animal Production Research.

The main topic of his research interest is grassland research covering grassland management, grazing, crop physiology of grasses, nutrient cycling in grassland ecosystems. Currently leading research projects 'Grassland in a changing climate' and 'Novel methods for reducing grassland originated nutrient load to inland waters.'

A member of British Grassland Society, The Scientific Agricultural Society of Finland, Finnish Peat Cultivation Society and Nordic Association for Agricultural Scientists.

Annette Longland

BSc in Biology at the University of Stirling in 1978 and PhD at Imperial College, London. She was a post-doctoral research fellow at the University of Hull, where she specialised in microbial degradation of plant cell walls. She began working with nutrition of pigs and ruminants at the Institute of Grassland and Environmental Research (IGER) in the early 1990's. By the mid-1990's her work focused on the utilisation of plant carbohydrates by equids, particularly in relation to forages and fibrous feeds. At this time she was also involved in determining changes in the carbohydrate content and composition of temperate grasses throughout the growing season.

In 2005 she set up her own equine nutrition research consultancy, ELNS. She has supervised a number of MSc and PhD students in the UK and abroad.

Koldo Osoro

He finished his degree in Veterinary in Facultad de León, 1978 and started to work as a Veterinary shortly after. Between 1983 and 1987 he finished his PhD at the Centro de Investigaciones Agrarias de Mabegondo (La Coruña) "Producción de carne con vacas de cría en zonas de montaña" for the University of Leon, under the supervision of Professor Eduardo Zorita. The post-doctoral followed shortly after, taking him from the Instituto Nacional de Investigaciones Agrarias to the Hill Farming Research Organization (Edinburgh, Scotland) where he continued his line of research in the interactions: available vegetation x management strategies = animal production + vegetal dynamics.

He has participated and coordinated in several projects national and internationally.

Bertrand Dumond

Bertrand Dumond has a degree in Zootechnie by ENSA de Montpellier and in Diplôme d'Etudes Approfondies de l'Université de Rennes1 (Biologie des Populations et Eco-éthologie) (1991). His PhD was housed by the Université de Rennes1 (Sciences de la Vie et de l'Environnement). In 2006 he became an Investigation Supervisor for the University Blaise Pascal, Clermont-Fd (Sciences de la Vie et Modélisation). He is currently responsible for the "Relations Animal-Plantes et Aliments" of URH (Unité de Recherches sur les Herbivores), member of the Scientific Committee of ORE's "Agro-écosystèmes Cycles Biogéochimiques et Biodiversité" and leader of the project "Evaluation of a set of indicators and synthesis of the interactions between grassland management, diversity and environmental services at a local level" of the European

MultiSward program. His researches focus on diet selection by grazing herbivores and their impact on sward structure and pasture biodiversity. He has compared diet selection by sheep, cattle and horses within a range of contrasting environmental conditions, and is investigating diet selection (e.g., food categorization) and herd distribution (e.g., collective decisions and leadership) in complex environments.

Ray Smith

Dr. Ray Smith is a native of Georgia and received his undergraduate degree from Asbury University in Kentucky in 1983. After teaching high school biology, he entered a graduate degree program in agronomy at the University of Georgia where he completed master and PhD degrees in breeding and management of alfalfa and tall fescue. From 1991 to 2001, he held a research, teaching and extension position at the University of Manitoba, Canada with a focus on alfalfa and perennial grass breeding, seed production and forage management. He was the Extension Forage Specialist in Virginia from 2001 through 2004. Currently, he is Associate Professor in the Kentucky University (Department of Plant and Soil Sciences) and one of the two Forage Extension Specialists in Kentucky. He is also Vice President of the American Forage and Grassland Council. His current research projects include: horse pasture evaluation methods, evaluating forage varieties for grazing tolerance and yield, integrating forage and biomass production systems, and developing computer teaching models.

Cecilia Muller

Cecilia is a post doctorate at the Swedish University of Agricultural Sciences (Department of Animal Nutrition and Management). She does research and teaching within feed science, especially production and utilization of forages for horses and is secretary in the Horse Committé at VH-faculty. Her main research interests include equine nutrition and management, especially forage production and utilization, silage and haylage production, conservation and utilization of forages in equine nutrition, hygienic quality of feeds, equine welfare in relation to feeding and nutrition, aiming to understand factors affecting forage nutritive and hygienic quality in relation to equine feeding, and how these factors affect the horse. She also takes part in Feed Science Network (Industry) and is a Member of the Group for Horse related issues at the Ministry for Rural Affairs in Sweden.

Anna Jansson

Anna Jansson is associate professor at the Swedish University of Agricultural Sciences (Department of Animal Nutrition and Management) and professor at Holar University College on Iceland. Her main research areas are nutrition and exercise physiology. She is currently running four major projects; one on the metabolic response to forage only diets compared to traditional starch rich diets on athletic horses, one on feeding a forage only diet and reducing the amount of training to young Standardbred horses, one on the phosphorous excretion of horses and one on the exercise response in Icelandic horses. Anna is currently supervising three PhD students in these projects.

Nicoletta Miraglia

Nicoletta Miraglia is born in Naples (I) in 1957. She is Associate Professor on Animal Nutrition at the Molise University (Campobasso, Italy). The research activity concerns mainly studies on horse nutrition referred to digestibility trials with different methodologies, the utilization of

pastures by horses, the exploitation of marginal lands by equines and safeguards programs of equine endangered populations. She is an Editor of "ANIMAL" (Section Livestock farming animals). Since 2008 she is President of the Horse Commission of The European Association for Animal Production (EAAP).

Bridget Young

Bridget obtained her PhD in Animal Nutrition from University College Dublin and is currently a Lecturer in the Faculty of Science and Engineering, Department of Life Sciences at the University of Limerick in Ireland since 2003. She is currently Course Director of the Full time and Distance Education Equine Programmes (Degree, Diploma and Certificate) at the University. Her PhD research examined nutrient metabolism in ruminants and was conducted at Teagasc Animal and Grassland, Research & Innovation Centre, Moorepark, Fermoy, Co. Cork. Since her appointment at UL she has established laboratory facilities in the Department of Life Sciences to conduct research in Equine Nutrition. She has successfully supervised a number of MSc projects and acted as Internal Examiner on a number of PhD projects. Her research interests include feed and forage utilisation in horses, feeding for performance and feeding behaviour. She has published in peer-reviewed journals and many conference proceedings in the field of animal nutrition.
